

Press release 11th July 2019

## Follicum receives approval of patent in Korea

**Follicum AB ("Follicum") today announces that the Korean patent office ("KIPO") has approved the company's patent application for stimulation of hair growth.**

With the approval in Korea, patent number 10-1992282, Follicum has a patent protection in Korean up to and including year 2032. The patent protects the company's peptides in general and for stimulation of hair growth in particular.

### **CEO Jan Alenfall comments**

*- This patent approval is exciting as Korea is an important market for hair growth products. Other than the formal approval from Korea this patent has been approved in the US, Europe, China, Australia, Russia, Hong Kong and Japan. We now have a very good protection regarding our candidate molecule FOL-005 and other peptides on significant markets around the world.*

### **About Follicum AB**

Follicum is a biotech company focusing on the discovery and development of peptide-based drugs. The primary focus is in hair growth stimulation, where Follicum has obtained very promising results with FOL-005 in a recently completed clinical trial. In diabetes, Follicum's research has resulted in a new peptide class which significantly increases the release of insulin in pre-clinical models. The company was founded in 2011, and is based in Lund, Sweden. Follicum is listed on the Swedish small cap exchange Spotlight since 2014. [www.follicum.com](http://www.follicum.com).
